Year-End Operations Review

Luke Malmgren

It was another busy year for our line crews. We installed 29 new services and worked with members on 53 service rebuilds across the system.

To support system growth and replace aging infrastructure, crews built approximately 6 miles of new three-phase overhead line and 3 miles of new underground line. We also upgraded existing facilities by rebuilding 4 miles of single-phase overhead line and 4 miles of underground line.

Pole inspections remained a major focus this year. Crews inspected 1,688 poles and identified 141 poles for replacement. Finding and replacing these poles before they fail helps improve system reliability and reduce future outage risks.

Throughout the year, crews remained busy with construction projects, maintenance work, and outage response. Their dedication and hard work continue to help provide safe and reliable service to our members.

Line Patrol and Inspection

Each year, South Central Electric linemen inspect every overhead and underground power line on our system. During these inspections, crews look for damaged equipment, loose or missing hardware, and other potential reliability or safety concerns.

You may see crews driving along power lines or entering properties to inspect equipment. If no work is performed, they are likely conducting a routine inspection.

All crews will be traveling in clearly marked South Central Electric vehicles. We appreciate your cooperation as we work to maintain a safe and reliable electric system for our members.

ONLINE PAYMENT & BILLING w/ SMARTHUB
